ABOUT ME

I'm a passionate Web & App Developer with a focus on UI/UX design, creating intuitive and visually engaging digital experiences. I specialize in building responsive websites and mobile apps that combine clean design with smooth functionality. My goal is to turn ideas into user-friendly solutions that look great and perform even better.

WORK EXPERIENCE

- Designed minimalist and innovative user interfaces focused on seamless user experience
- Transformed user needs into intuitive and clean digital designs.
- Balanced simplicity with creative uniqueness to enhance visual appeal.
- Delivered user-centered solutions improving functionality and engagement.

OUR TEAM PROJECTS

The Book Swap app helps people easily exchange books with others in their community. Users can list books they want to share, search for books available, and request swaps. The app focuses on easy use, clear design, and building trust between users. User feedback helped improve features like searching, rating, and communicating. This project promotes reading, saves money, and supports recycling books.
